		Examiner	Art Unit			
	·	John A. McPherson	1756			
	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1)🖂	Responsive to communication(s) filed on 11 M	lay 2007.				
		action is non-final.				
3) 🗌	ince this application is in condition for allowance except for formal matters, prosecution as to the merits is					
	closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 1756

DETAILED ACTION

Claim Objections

1. Claim 10 is objected to because of the following informalities:

In line 8, "laeyr" should be corrected to --layer--.

In line 12, after "(RIE)", the period (.) should be deleted, and replaced with a semicolon (;).

In line 15, after "electrode", a period (.) should be inserted.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-11 and 17 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling, because an invention lacking limitations critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

Claims 10 and 17 are both drawn to a method of manufacturing a magnetoresistive sensor, each comprising a plurality of steps. However, each of these claims is missing steps which are disclosed in the specification as critical and essential to the method. Specifically, neither claim 10 not claim 17 include the steps of lifting off a photoresist mask to form a trench in a layer of magnetic material; depositing sensor

Page 3

material layers such that a portion is deposited into the trench while other portions are deposited outside the trench; and performing chemical mechanical polishing to remove portions of the sensor material outside of the trench. For example, see page 7, line 3-12 of the specification.

Claim 1 is drawn to a method of manufacturing a magnetoresistive sensor comprising the step of chemical mechanical polishing sufficiently to remove portions of said sensor layers formed outside said sensor area, however it lacks the critical and essential steps of lifting off the photoresist mask to form a trench in the layer of magnetic material, and depositing the sensor layers such that a portion is deposited into the trench while other portions are deposited outside the trench.

Claim 11 is drawn to a method of manufacturing a magnetoresistive sensor comprising steps which define a trench in a magnetic material and deposit sensor material layers in the trench, however it lacks the critical and essential step of, after depositing the sensor material layers, performing a chemical mechanical polishing process to remove portions of the sensor material disposed outside the trench. Claims 12-16 are not included in this rejection because claim 12 provides the critical and essential step which is missing from claim 11.

Pertinent Prior Art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Application/Control Number: 10/815,447 Page 4

Art Unit: 1756

Allowable Subject Matter

4. Claims 12-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John A. McPherson whose telephone number is (571) 272-1386. The examiner can normally be reached on Monday through Friday, 8:00 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on (571) 272-1385. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a
